YUKON RETAIL SALES
January 2006

1 Monthly Retail Sales, Yukon *(not seasonally adjusted)*

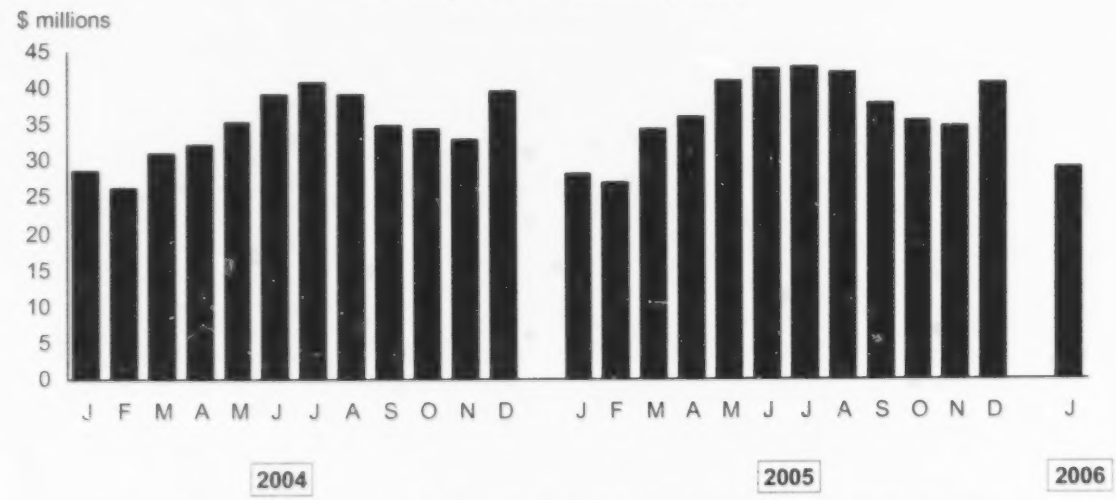
- Total preliminary retail sales in the Yukon for the month of January 2006 were ——— **$29,096,000**
- The January 2005 figure was ——— **$28,225,000**
- The difference was an **increase** of ——— **$871,000**
- As a percentage the **increase** was ——— **3.1%**

Preliminary unadjusted estimates of Yukon retail sales for January 2006 **increased 3.1%** from figures for January 2005. Canada's retail sales were **up 7.0%** over the same time period.

On an annual basis, revised retail sales in the Yukon for 2005 totalled $443,388,000; an increase of $29,422,000 or 7.1% over the 2004 annual total of $413,966,000.

Retail sales in the Yukon follow a seasonal trend with higher sales during the summer months and lower sales in the winter. The month of December is the exception with strong retail sales during the Christmas season.

Yukon Monthly Retail Sales
January 2004 to January 2006



Each column represents a month of the year, with the first letter of the month's name listed below the column.

5 Retail Trade Survey Information

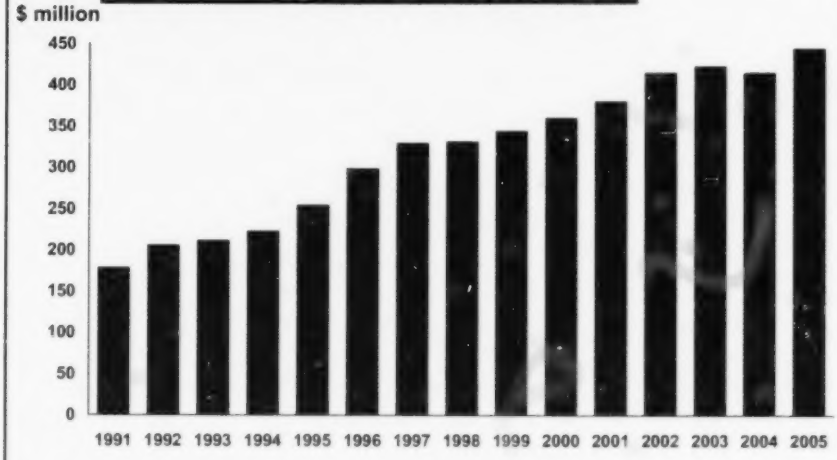
Retail sales figures obtained from GST returns are a key monthly indicator of consumer purchasing patterns in Canada. Furthermore, retail sales are an important component of the Gross Domestic Product, which measures Canada's production, and are part of many economic models used by public and private agencies. The Bank of Canada relies partly on monthly retail sales estimates when making decisions that influence interest rates. Businesses use retail sales estimates to track their own performance against industry averages and to prepare investment strategies.

***New Methodology Changes as of October 2005 Release:**

The October 2005 release marked the implementation of measures to reduce response burden in the Monthly Retail Trade Survey. Data previously collected via questionnaire for a number of simple retail establishments in the survey sample are now replaced with modeled estimates based on Goods and Services Tax (GST) returns. The model takes into account the sales to revenue relationship, as well as the time lag between the reference month for the survey and the reference period of the GST estimates. This change has had minimal impact on retail estimates.

Unadjusted and seasonally adjusted monthly estimates in current and constant dollars have been revised starting from January 2003. These revisions are available on CANSIM and by request. This publication only deals with the raw (unadjusted) figures. 'Unadjusted retail trade figures' means the sum of all raw retail trade sales for a given month. 'Seasonally adjusted' refers to the technique of adjusting the "raw" figures to remove seasonal fluctuations.

6 Retail Sales *(not seasonally adjusted)* Annual Estimates, 1991 to 2005



During the past 15 years, retail sales in the Yukon have ranged from a low of $178,229,000 in 1991 to the 2005 figure of $443,388,000. The largest increase in sales over the previous year occurred in 1996 when sales were up $44,244,000, or 17.4%, over sales in 1995. The only decrease in sales occurred in 2004 when sales fell $7,682,000, or 1.8%, from the 2003 figure.

Retail sales in the Yukon have steadily increased each year since 1991 with exception of the slight decrease in 2004.

	Yukon		Canada	
	Retail Sales ($million)	% change from previous year	Retail Sales ($million)	% change from previous year
2005 (r)	443.4	7.1	367,828.5	6.1
2004	414.0	-1.8	346,721.5	4.7
2003	421.6	1.9	331,146.6	3.6
2002	413.9	9.0	319,525.4	6.3
2001	379.6	5.6	300,447.9	4.4
2000	359.4	4.6	287,838.4	6.0
1999	343.7	3.9	271,532.0	5.9
1998	330.9	0.6	256,494.4	3.9
